

**DEPARTMENT OF**  
**COMPUTER SCIENCE & ENGINEERING**  
Discover. Learn. Empower.

**WORKSHEET 7**

Student Name: Raj

UID: 23BAI70387

Branch: CSE(3<sup>rd</sup> Year)

Section: 23AIT\_Krg\_G2

Semester: 5<sup>th</sup>

Date of Performance: 27/10/25

Subject Name: ADBMS

Subject Code: 23CSP-333

**1. AIM:**

i) Triggers: Student Data Change Monitoring (Medium)

EduSmart Institute wants to monitor all insertions and deletions in the student database. Whenever a new student record is inserted or deleted from the student table, the details of that record should be displayed on the PostgreSQL console window.

Objective:

Design a PostgreSQL trigger that:

1. Prints the complete details of the inserted or deleted student record using RAISE NOTICE.
2. Activates automatically after every INSERT or DELETE operation on the student table.

ii) Triggers: Employee Activity Logging (Hard)

TechSphere Solutions wants to maintain an automatic audit trail for all employee additions and deletions in the company database.

Whenever a new employee is added or removed from the tbl\_employee table, an entry should be recorded in the tbl\_employee\_audit table for tracking purposes.

Objective:

Design a PostgreSQL trigger that:

1. Inserts a message in tbl\_employee\_audit whenever a new employee is added or deleted.
2. The message should include the employee's name and the current timestamp.
3. Activates automatically after every INSERT or DELETE operation on tbl\_employee.

Tools Used : Postgres

**Solutions:**

Q1)

```
--CREATING A TABLE
CREATE TABLE student ( id
    SERIAL PRIMARY KEY,
    name VARCHAR(100), age
    INT, class VARCHAR(50)
);
```

```
--TRIGGER FUNCTION
```

```
CREATE OR REPLACE FUNCTION fn_student_audit()
RETURNS TRIGGER
LANGUAGE plpgsql
AS
$$ BE
GIN
IF TG_OP = 'INSERT' THEN
    RAISE NOTICE 'Inserted Row -> ID: %, Name: %, Age: %, Class: %', NEW.id,
        NEW.name, NEW.age, NEW.class;
    RETURN NEW;
ELSIF TG_OP = 'DELETE' THEN
    RAISE NOTICE 'Deleted Row -> ID: %, Name: %, Age: %, Class: %', OLD.id,
        OLD.name, OLD.age, OLD.class;
    RETURN OLD;
END IF;

RETURN NULL;
END;
$$;
```

```
--CREATING A TRIGGER
CREATE TRIGGER trg_student_audit
AFTER INSERT OR DELETE
ON student
FOR EACH ROW
EXECUTE FUNCTION fn_student_audit();
```

Q2)

```
CREATE TABLE tbl_employee (
    emp_id SERIAL PRIMARY
    KEY,          emp_name
    VARCHAR(100), designation
    VARCHAR(50),
```

```

    salary NUMERIC(10,2)
);
CREATE TABLE tbl_employee_audit (
    audit_id SERIAL PRIMARY KEY,
    message TEXT, created_at TIMESTAMP DEFAULT
    CURRENT_TIMESTAMP
);

CREATE OR REPLACE FUNCTION audit_employee_changes()
RETURNS TRIGGER
LANGUAGE plpgsql
AS
$$ BE
GIN
IF TG_OP = 'INSERT' THEN
    INSERT INTO tbl_employee_audit(message)
    VALUES ('Employee name ' || NEW.emp_name || ' has been added at ' || NOW()); RETURN
    NEW;
ELSIF TG_OP = 'DELETE' THEN
    INSERT INTO tbl_employee_audit(message)
    VALUES ('Employee name ' || OLD.emp_name || ' has been deleted at ' || NOW());
    RETURN OLD;
END IF;

RETURN NULL;
END;
$$;

```

```

CREATE TRIGGER trg_employee_audit
AFTER INSERT OR DELETE
ON tbl_employee
FOR EACH ROW
EXECUTE FUNCTION audit_employee_changes();

```

```

INSERT INTO tbl_employee (emp_name, designation, salary)
VALUES ('Supriya Dutta', 'Software Engineer', 55000);

```

```

SELECT * FROM tbl_employee_audit;

```

```

DELETE FROM tbl_employee WHERE emp_name = 'Supriya Dutta';

```

```

SELECT * FROM tbl_employee_audit;

```

### 3. Output:

### 4. Learning Outcomes:

1. Understand the concept and purpose of database triggers in PostgreSQL.
2. Learn how to automate data tracking using AFTER INSERT and AFTER DELETE triggers.
3. Gain hands-on experience with trigger functions written in PL/pgSQL.
4. Develop the ability to implement audit logging for real-time database monitoring.
5. Enhance skills in maintaining data integrity and traceability in relational databases.
